

## TEST VERNOLAB GRDEXP

### What's new?

Vernolab's test is a unique customized solution, useful for preventive maintenance.  
The added value of the used oil analysis service is the diagnosis: a result of the expertise of our mechanical engineers.

It is recommended to realize tests once a year. This report is the unique way for you and your customers to measure the quality evolution of your units and propose preventive / corrective maintenance.

### TO GUARANTEE MATERIAL PERFORMANCE

The lubricant carries important information that the laboratory will extract.  
After analysis, the diagnosis provides valuable information about the condition of the equipment and lubricant.  
Increase efficiency of your equipment.

### TO SHOW THE RELIABILITY OF CARRIER'S PRODUCTS IN THE LONG TERM

- Minimize downtime of critical parts of machinery
- Detect problems as soon as they appear
- Minimize repair costs and equipment outage through planned maintenance programs
- Maximize lubricant use through extended drain intervals
- Extend equipment life and increase Carrier equipment efficiency

### TO ADVISE CUSTOMERS ON PREVENTIVE MAINTENANCE

- Schedule maintenance operations
- Reduce significantly direct and indirect maintenance costs
- Avoid unexpected incidents.

Advantages are as follows:

- Simple indicators to facilitate results interpretation,
- Diagnostic summary,
- Comparison with older samples to follow the trend,
- Graphics to follow critical or sensitive analyzes,
- Historical results of last samples and highlight abnormal results
